SUMMARY

B.Tech CSE student skilled in full-stack development using Java, Spring Boot, React, and REST APIs. Strong foundation in DSA, backend systems, scalable application development, and collaborative software engineering.

EDUCATION

Parul University

Bachelor of Technology in Computer Science and Engineering

Vadodara, Gujarat

2023 – 2027

- Current CGPA: 7.63
- Key Subjects: Data Structures and Algorithms, DBMS, Software Engineering, Web and Mobile Development, Operating Systems, Java, C, Azure Fundamentals.

EXPERIENCE

Open Source Contributor

Remote

GirlScript Summer of Code (GSSoC) 2026

- Implement a multimodal privacy masking engine with geometric masking, blur regions, and regex-based sensitive data redaction for real-time privacy protection.
- Develop a collaborative wardrobe-sharing feature enabling users to share shopping carts through encoded URLs with preview, merge, and overwrite functionality.
- Build a real-time customer service request layer using WebSockets, REST APIs, and admin notification systems for live request tracking and management.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, React, Spring AI

Databases & Infra: MySQL, PostgreSQL, MongoDB, Redis, Kafka

AI/ML: Generative AI, Spring AI, Machine Learning

Tools & Platforms: Git, GitHub, Maven, Postman, AWS

Core Concepts: DSA, OOP, DBMS, Operating Systems, REST APIs, Microservices, WebSockets, JWT Authentication, JUnit 5

PROJECTS

Brewly - Full-Stack POS & Billing System | Spring Boot, PostgreSQL, React, Spring AI

GitHub | Live

- Developed a café management platform with POS billing, dashboard analytics, inventory management, and event booking features.
- Implemented JWT + Google OAuth 2.0 authentication, data-driven AI insights (revenue forecasting, peak hour analysis, stock depletion prediction), and Excel export functionality.
- Built an AI-powered assistant using Spring AI Function Calling for live business insights and technical support.
- Performed API testing and validation using Postman to verify authentication, order workflows, and backend responses.

LogFlow | Spring Boot, React, Kafka, MongoDB, Groq AI, Python

GitHub | Live

- Built an event-driven log ingestion pipeline using Python and Kafka to stream microservice logs into MongoDB.
- Engineered a real-time Alert Engine that automatically detects error spikes and uses LLaMA 3.1 to generate instant root cause analyses.
- Developed an adjustable, full-stack React dashboard with WebSockets to broadcast live AI alerts and visualize log metrics.

JSON Parser | Java, JUnit

GitHub | Live

- Optimized parsing throughput via a zero-allocation Lexer utilizing `char[]` buffers, validated by JMH benchmarks.
- Architected an AST-backed JSONPath query engine executing complex filters and recursive DFS traversals.
- Built a dynamic POJO mapper leveraging the Java Reflection API and custom runtime annotations for object serialization.

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Academy Graduate:** AWS Academy Cloud Foundations
- **HackerRank Certified:** Java and Python
- Solved 700+ DSA problems across coding platforms.
- Selected for GSSoC (GirlScript Summer of Code) 2026 in Open Source and AI Agent tracks.
- Selected for the State-Level Regional Round in OpenAI Academy Hackathon.
